

Safety Officer's Kit

Occupational Noise Measurement Kit

To measure noise at work to international health and safety regulations

What is the Safety Officer's Kit?

The Safety Officer's Kit is a complete set of noise measurement tools that you can configure to meet your exact needs. The Safety Officer's Kit contains an Optimus+ sound level meter and a set of doseBadge noise dosimeters, along with all the accessories required for each instrument.

Each kit includes:

- Sound level meter
- Noise dosimeters
- Acoustic calibrator
- Accessories

Choose your ideal combination of instruments

We understand that every business's needs are different, which is why you can customise the instruments included in the Safety Officer's Kit.

The noise dosimeters in your kit can either be the Original doseBadge, Intrinsically Safe doseBadge, or Advanced doseBadge⁵, depending on your needs.

Your sound level meter can also be customised. Whether you're just measuring occupational noise or need to measure environmental noise too, you can either choose the Optimus+ Red or Optimus+ Green to ensure you have the features you need to suit your business's requirements.
